JONATHAN HARDWICK

APPOINTED DIRECTOR 5 FEBRUARY 2026

Mr Hardwick has extensive business experience

Prior to his current business, Mr Hardwick was C
Laws and a Bachelor of Commerce.

Mr Hardwick is a member of the Racing Victoria

The names of directors of the Company that ceased during or since the end of the financial year are as follows:

Sharon McCrohan Appointed Director 9 October 2017 and Deputy Chair 21 June 2024. Resigned as Deputy Chair and Director 30 September 2025.

OFFICERS

Simonette Foletti Company Secretary; appointed 1 January 2024

PRINCIPAL ACTIVITIES, STRATEGY AND OBJECTIVES

The consolidated entity's principal activities in the course of the financial period were related to the administration and promotion of thoroughbred racing in the State of Victoria.

Racing Victoria has a critical stewardship role to lead the Victorian Thoroughbred Racing Industry (VTRI), with a focus on growing the sport and ensuring the ongoing sustainability of the industry as a whole, for the benefit of all industry stakeholders.

Racing Victoria's key goals and objectives are to:

- Manage thoroughbred racing to maintain Victoria's pre-eminence;
- Maintain the highest standards of integrity and equine and participant safety and welfare;
- Manage the racing calendar to maximise engagement;
- Encourage sustainable participation;
- Meet social obligations;
- Optimise economic benefits;
- Ensure efficient operation of the industry;
- Focus on sustainable industry funding;
- Advocate and promote the industry;
- Maintain independence.

DIVIDENDS

Under the Company's constitution no dividends may be declared or paid.

REVIEW OF OPERATIONS

The net surplus of the consolidated entity for the financial year ended 30 June 2026 was $0.773 million compared to a net deficit of $8.885 million in the prior year.

The consolidated entity reported a net surplus in 2026 following two consecutive years of planned budget deficits. The result reflects the first full reporting period under the revised industry funding framework, together with a continued focus on financial sustainability and disciplined cost management.

The 2026 reported result also reflects the impact of sev
including matters relating to historical periods, investm
undertaken for the future benefit of the VTRI. Following

The Racing Victoria business model is designed to generate sufficient revenue to enable ongoing investment in the delivery of world-class racing and to support the long-term sustainability of the VTRI and its various participants and stakeholders.

The consolidated entity has a significant reliance on wagering-related revenue, with approximately 84% of total revenue derived either directly from race fields product fees or indirectly through media rights fees and Point of Consumption Tax (PoCT) distributions, each of which is influenced by wagering activity and performance.

Excluding the expenditure required to govern, operate, administer, market and promote Victorian thoroughbred racing, which represents approximately 11% of total revenue, the majority of Racing Victoria expenditure is directed towards funding, supporting, and growing the industry, its stakeholders and participant base.

The principal areas of income and investment are outlined below.

Revenue

The total revenue from operations increased by 1.0% to million).

Total wagering revenue for the full year decreased by $ full year under the revised industry funding framework August 2024. The transition has materially changed the fields income, PoCT distributions and fixed State Gover funding streams.

Total wagering turnover of approximately $7.39 billion prior year. This headline decline should be considered i approximately 160 fewer races conducted across the ye On an underlying basis, average turnover per race incre thoroughbred racing product remained resilient despite market pressures.

The wagering market continued to be influenced by co increased regulatory scrutiny and reduced wagering se promotions. Free bet turnover decreased by approxima tightening in Wagering Service Provider (WSP) genero factors continued to place pressure on total turnover, a outcomes showed signs of stabilisation.

Race fields income increased to $228.8 million, up 2.2% on the prior year, despite the decline in total turnover. This outcome was supported by the full-year impact of race fields model changes introduced during the prior reporting period. Average yields remained marginally above prior year.

State Government funding provided an additional source of long-term funding certainty under revised industry distribution arrangements. The result for the reporting period was favourably impacted by a full twelve months of fixed State Government funding, compared with eleven months recognised in the prior period due to the August 2024 commencement date.

Victorian Racing Industry Funding (VRIF) grants were also received to fund infrastructure projects during the period and to support initiatives including major events, owners ticketing, and the VOBIS program.

Media revenue decreased by $2.311 million (-2.7%) to $83.061 million. The decline primarily related to a softening in the wagering advertising market that impacted on the revenue generated by Racing.com.

Funds under investment (excluding withdrawals) increased in value over the period, driven by continued interest income and growth in major financial markets. Total investment revenue, including realised gains/losses, unrealised gains/losses, dividends and interest income, was positive for the year at $3.577 million (2025: $6.359 million). Although investment returns were below budget expectations, the portfolio remained in a positive position despite periods of market volatility and uncertainty experienced throughout 2026.

Expenditure

Total expenditure for the full year decreased to $530.751 million (2025: $533.498 million).

Industry Expenditure

Industry expenditure reflects targeted funding and investment provided to owners, participants and clubs and accounts for the majority of the consolidated entity expenditure (76% of revenue).

- Prizemoney and VOBIS bonuses on offer remained in line with prior year at circa $316 million.

The consolidated entity's contribution towards this expenditure increased marginally by $0.209 million (+0.1%) to $265.970 million. Savings arising from the planned reduced racing program were redirected towards strategic prizemoney enhancements, including key Spring Racing Carnival features and increases to country maiden race prizemoney. The variable nature of items such as bonus strike rates, field sizes, divided races and meeting abandonments also has an impact on the final contribution quantum.

It should be noted that the consolidated entity's reported contribution does not include prizemoney directed to welfare programs, top-up contributions made by clubs and other entities, or any retained amounts.

- Club support including both direct funding and infrastructure related expenditure increased on prior year.

Club funding expenditure increased by $1.469 million (+1.6%) to $91.422 million. The annual increase is largely due to indexation related arrangements and variable club funding streams. Club funding is undertaken in accordance with funding arrangements in place with each club, which have both fixed and performance-based components.

Infrastructure expenditure increased by $1.447 million (+28.2%) to $6.573 million, driven by continued investment in infrastructure projects underway to support club growth and long-term development.

- Industry and participant support spend reflects the continued commitment to support the industry through various initiatives and programs.

This support increased by $3.485 million (+9.5%) to $4
participant and thoroughbred welfare programs that ar
percentage of prizemoney on offer. Other forms of sup
coverage, workforce development including the appren
the prior year was primarily driven by rising jockey Wor
experience, fuel cost relief subsidies paid to jockeys and
for owners, Victorian bushfire appeal support, and addi

Welfare and Community

Included within industry and operating expenditure is R
community initiatives, as outlined below.

Equine welfare remains fundamental to the sustainabilit
to invest in programs and initiatives that support the hi
thoroughbred's life, both on and off the racetrack. Tota
period was $5.063 million.

Racing Victoria also continued to provide essential prog
and their families, while promoting health, safety and w
facilities. Total expenditure on jockey welfare (excluding
reporting period was $2.687 million and $4.438 million,

Following the devastating bushfires that impacted Vict
provided important support to members of the Victoria

more broadly. The appeal raised in excess of $200,000, which contributed to a range of relief initiatives, including support for the Country Fire Authority, livestock transportation, accommodation assistance, and psychological services for affected individuals.

Racing Victoria also made meaningful contributions to a number of charitable and community organisations throughout the reporting period, including a significant contribution of $150,000 to the Good Friday Appeal in partnership with Country Racing Victoria and Southside Racing.

Investment Activities

Racing Victoria holds and invests financial assets on behalf of the VTRI as part of an Industry Sustainability Fund (ISF). The purpose of the ISF is to ensure that the industry retains sufficient funds to protect the long-term sustainability of the industry, support the operating financial position and maintenance of important industry support during times of operational uncertainty, provide funds to support important industry-wide capital infrastructure investments and to assist with finance and investment that may not be otherwise available.

The ISF framework defines its assets as those investments which have a broader industry benefit with an investment or commercial return objective, interest bearing loans with related parties (at discount to market rates), and land earmarked for development with a commercial return.

The consolidated entity engages Evans and Partners to manage and invest accumulated surplus cash that sits outside operating cash requirements. A balanced investment mandate is maintained, with investments made across various asset classes including cash, interest rate securities, Australian and international equities, property, infrastructure and alternative investments. The investment mandate and asset allocations are reviewed on an annual basis together with the governing investment policy.

At 30 June 2026 these financial assets totalled $62.557 million (2025: $57.839 million).

The increase from the prior year reflects the combined effect of growth in investment holdings and net deposits of $2.500 million arising from the surplus cash generated during the reporting period, partially offset by the impact of market volatility.

CHANGES IN STATE OF AFFAIRS

There was no significant change in the state of affairs of the consolidated entity during the financial year.

SUBSEQUENT EVENTS

On 19 August 2026, the Australian Parliament passed the Interactive Gambling Amendment (Gambling Reform) Bill 2026, introducing significant restrictions on wagering advertising and related promotional activities. The reforms are scheduled to commence from 1 January 2027 and are intended to reduce community exposure to wagering advertising and strengthen gambling harm minimisation measures.

Other than as disclosed above, no matter or circumstance has arisen since the end of the reporting period that has significantly affected, or may significantly affect, the operations of the consolidated entity, the results of those operations, or the state of affairs of the consolidated entity in future financial periods.

FUTURE DEVELOPMENTS

Following the passage of the Interactive Gambling Amendment (Gambling Reform) Bill 2026, the consolidated entity will continue to assess the potentia
regarding the practical implementation of certain meas

KPMG

We are required to report if we conclude that there is a material misstatement of this Other Information, and based on the work we have performed on the Other Information that we obtained prior to the date of this Auditor's Report we have nothing to report.

Responsibilities of the Directors for the Financial Report

The Directors are responsible for:

- preparing the Financial Report in accordance with the *Corporations Act 2001*, including giving a true and fair view of the financial position and performance of the Group, and in compliance with *Australian Accounting Standards - Simplified Disclosures* and the *Corporations Regulations 2001*
- implementing necessary internal control to enable the preparation of a Financial Report in accordance with the *Corporations Act 2001*, including giving a true and fair view of the financial position and performance of the Group, and that is free from material misstatement, whether due to fraud or error
- assessing the Group and Company's ability to continue as a going concern and whether the use of the going concern basis of accounting is appropriate. This includes disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless they either intend to liquidate the Group and Company or to cease operations, or have no realistic alternative but to do so.

Auditor's responsibilities for the audit of the Financial Report

Our objective is:

- to obtain reasonable assurance about whether the Financial Report as a whole is free from material misstatement, whether due to fraud or error; and
- to issue an Auditor's Report that includes our opinion.

Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with *Australian Auditing Standards* will always detect a material misstatement when it exists.

Misstatements can arise from fraud or error. They are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of the Financial Report.

A further description of our responsibilities for the audit of the Financial Report is located at the *Auditing and Assurance Standards Board* website at: https://www.auasb.gov.au/media/apzlwn0y/ar3_2024.pdf. This description forms part of our Auditor's Report.

Victoria.

- Current Membership

The current membership of Racing Victoria now comprises of:

Club members: Country Racing Victoria, Melbourne Racing Club, Moonee Valley Racing Club, Victoria Racing Club & Cranbourne Pakenham Racing Club. Industry body members: Australian Jumping Racing Association, Australian Services Union (Victorian Branch), Australian Trainers Association (Victorian Division), Australian Workers Union (Victorian Division), Media and Entertainment Arts Alliance, Thoroughbred Breeders Victoria, Thoroughbred Racehorse Owners Association, United Workers Union, Victorian Bookmakers Association & Victorian Jockeys Association.

- Victorian Thoroughbred Racing Industry Revenue and Grants

On 16 August 2012, the Victorian Racing Industry (VRI) entered into joint venture arrangements with the Tabcorp group of companies covering the VRI entitlement to receive a distribution of joint venture profits and other program and product supply fees over a 12-year term. On 18 December 2023, a new Victorian wagering licence was awarded for the period beyond 16 August 2024. In connection with that new licence, the State Government and the VRI confirmed the discontinuation of the historical joint venture industry funding arrangements tied to the Victorian wagering licensee. To provide the VRI with greater certainty of its financial outcomes and to assist the transition to a new industry funding model, the joint venture parties agreed to amend and restate the joint venture arrangements covering the final period of the current licence from 1 June 2023 to 15 August 2024 including transition out. An Umbrella Deed was executed on 1 March 2024 which captured the terms of payments to be made to the VRI by Tabcorp in connection with the winding up and transitioning out of the joint venture.

New industry funding arrangements commencing from 1 July 2024 were agreed between the Victorian State Government and the VRI. These arrangements sought to maintain VRI funding at no less favourable levels to those under the previous joint venture arrangements and included:

- From 1 July 2024, the State Government increased the Point of Consumption Tax (PoCT) levied on wagering by Victorian residents, with the rate of PoCT collected increasing from 10% to 15% of Net Wagering Revenue (NWR). The VRI distribution payment agreed to be paid to the VRI by the State Government increased from 3.5% to 7.5% of NWR effective from the same date.

- On 30 August 2024, the VRI together with the State Government executed the VRI Funding Deed. This ten-year agreement, which was backdated to commence on 16 August 2024, provides a new fixed industry distribution stream to the VRI.

The thoroughbred, harness and greyhound racing codes have agreed on an appropriate code sharing arrangement of the above VRI funding.

Material wagering income is also received by the VTRI in the form of race fields fees. Other significant income is generated via the exploitation of media rights in both domestic and international markets held by a fully owned subsidiary RVL Media Pty Ltd, advertising revenues received through owned media assets, returns from investments and the receipt of various Government grants.

The consolidated entity will endeavour to make grants to member clubs having regard to the following

Notes to the f
statements

FOR THE YEAR ENDED 30 JUNE 2026

principles:

- The consolidated entity will from time to time

Material Accounting Policies

The following material accounting policies have been a
financial report:

(a) AASB 15 Revenue from Contracts with Customers

VOBIS nomination fees received are deferred into une
years based upon the performance obligation of VOBI
age.

(b) Critical Accounting Judgements and Key Sources

In the application of the consolidated entity's account
is required to make judgements, estimates and assump
that are not readily apparent from other sources. The
historical experience and various other factors that are
the results of which form the basis of making the judg
estimates.

The estimates and underlying assumptions are reviewe
estimates are recognised in the period in which the es
period, or in the period of the revision and future perio
periods.

Notes to the financial statements

FOR THE YEAR ENDED 30 JUNE 2026

Critical judgements in applying the consolidated entity's accounting policies

Judgements made by management in the application of the consolidated entity's accounting policies that have significant effects on the financial statements and estimates with a significant risk of material adjustments in the next period are disclosed, where applicable, in the relevant notes to the financial statements.

Accounting policies are selected and applied in a manner that ensures that the resulting financial information satisfies the concepts of relevance and reliability, thereby ensuring that the substance of the underlying transactions or other events is reported.

The following are the key assumptions concerning the future, and other key sources of estimation uncertainty at balance date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial period.

- Impairment of Indefinite Life Intangible Assets

As described in note 23(g), the consolidated entity assesses the recoverable amount of indefinite life intangible assets, by estimating the future cash flows, growth and discount rate at the end of each annual reporting period.

- Provisions

As described in note 23(c) and 23(l), the consolidated entity estimates the present value of current obligations based on management estimate for general provisions (including infrastructure expenditure), Workcover, employee provisions at the end of each annual reporting period.

- Useful lives of Property, Plant & Equipment and Computer Software & Databases

As described in note 23(k), the consolidated entity reviews the estimated useful lives of property, plant and equipment at the end of each annual reporting period.

- Contingent Liabilities

The consolidated entity makes judgement on any potential liability that may occur depending on the outcome of an uncertain future event. These liabilities are listed under note 21.

All other material accounting policies adopted in the preparation and presentation of the financial report are included under note 23.

21. Contingent Liabilities

- Under the Deed of Contribution and Indemnity with the Victoria Racing Club (VRC), the consolidated entity has indemnified the VRC against any claims against the VRC arising from its previous operation of the thoroughbred racing industry in Victoria.
- Racing Victoria has guaranteed a loan facility of Cranbourne Pakenham Racing Club Inc. of $19.017 million (2025: $19.547 million).
- Racing Victoria holds capital commitment obligations to clubs in line with its formalised infrastructure plan. Whilst it appropriately provides for these projects following formal submission to the State Government VRIF program, there remain other projects where a commitment has been made to the club, however it is yet to reach the constructive obligation stage in the cycle.
- From time to time the consolidated entity may be subject to legal claims, however at signing date the awareness and quantum of any such claims remain unknown.

22. Subsequent Events

On 19 August 2026, the Australian Parliament passed the Interactive Gambling Amendment (Gambling Reform) Bill 2026, introducing significant restrictions on wagering advertising and related promotional activities. The reforms are scheduled to commence from 1 January 2027 and are intended to reduce

Notes to the f statements

community exposure to wagering advertising and stre

Other than as disclosed above, no matter or circumsta that has significantly affected, or may significantly affe results of those operations, or the state of affairs of th

23. Material Accounting Policies

The following material accounting policies have been financial report:

- Borrowings and Borrowing Costs

Borrowings are recorded initially at fair value, net of tr borrowings are measured at amortised cost with any the redemption value being recognised in profit and lo effective interest rate method.

Other borrowing costs are recognised as an expense i

- Cash and Cash Equivalents

Cash comprises cash on hand and demand deposits. investments that are readily convertible to known amo changes in value.

- Employee Benefits

A liability is recognised for benefits accruing to emplo long service leave, and sick leave when it is probable t of being measured reliably.

Liabilities recognised in respect of employee benefits at their nominal values, using the remuneration rate ex

Liabilities recognised in respect of employee benefits are measured as the present value of the estimated fu entity in respect of services provided by employees up

- Financial assets

Classification and measurement of financial assets

All recognised financial assets that are within the scop measured at amortised cost or fair value on the basis financial assets and the contractual cash flow characte

- debt investments that are held within a business model whose objective is to collect the contractual cash flows, and that have contractual cash flows that are solely payments of principal and interest on the principal amount outstanding, are subsequently measured at amortised cost;
- all other debt investments and equity investments are subsequently measured at fair value through profit and loss (FVTPL).

Despite the foregoing, the consolidated entity may make the following irrevocable election/designation at initial recognition of a financial asset:

- the consolidated entity may irrevocably elect to present subsequent changes in fair value of an equity investment that is neither held for trading nor contingent consideration recognised by an acquirer in a business combination to which IFRS 3 applies in other comprehensive income; and
- the consolidated entity may irrevocably designate a debt investment that meets the amortised cost or fair value through other comprehensive income (FVTOCI) criteria as measured at FVTPL if doing so eliminates or significantly reduces an accounting mismatch.

Debt instruments that are subsequently measured at amortised cost or at FVTOCI are subject to impairment testing.

Impairment of financial assets

In relation to the impairment of financial assets, AASB 9 requires an expected credit loss (ECL) model as opposed to an incurred credit loss model under IAS 39. The ECL model requires the consolidated entity to account for expected credit losses and changes in those expected credit losses at each reporting date to reflect changes in credit risk since initial recognition of the financial assets. In other words, it is no longer necessary for a credit event to have occurred before credit losses are recognised.

The consolidated entity reviewed its related party loan receivables for impairment under the General Approach to determine whether there has been a Significant Increase in Credit Risk (SICR) since initial recognition and whether loans are credit impaired. This determines whether the loans are in Stage 1, Stage 2, or Stage 3, which in turn determines both;

- the amount of ECL to be recognised: 12-month ECL or Lifetime ECL; and
- the amount of interest income to be recognised in future reporting periods: Effective Interest Rate (EIR) based on gross carrying amount of the loan which excludes ECL or the net carrying amount (i.e. the amortised cost) which includes ECL.

Lifetime ECL are the ECL that result from all possible default events over the expected life of loans whereas 12-month ECL are a portion of Lifetime ECL that represent the ECL that result from default events that are possible within 12 months of the reporting date.

The consolidated entity reviewed its related party loans and assessed that none of the loans have suffered SICR with no further credit losses recognised within 12 months of the reporting date.

Loss allowances for trade receivables are measured at an amount equal to lifetime ECLs. When determining

Notes to the f statements

the estimates of future cash flows have not been adjusted. Notwithstanding this, value in use is depreciated replacement cost of an asset when the future economic benefits of the asset are not primarily dependent on the asset's ability to generate net cash inflows and where the consolidated entity would, if deprived of the asset, replace its remaining future economic benefits. If the recoverable amount of an asset (or cash-generating unit) is estimated to be less than its carrying amount, the carrying amount of the asset (cash-generating unit) is reduced to its recoverable amount. An impairment loss is recognised in profit or loss immediately, unless the relevant asset is carried at fair value, in which case the impairment loss is treated as a revaluation decrease.

Where an impairment loss subsequently reverses, the carrying amount of the asset (cash-generating unit) is increased to the revised estimate of its recoverable amount, but only to the extent that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset (cash-generating unit) in prior periods.

A reversal of an impairment loss is recognised in profit or loss immediately, unless the relevant asset is carried at fair value, in which case the reversal of the impairment loss is treated as a revaluation increase.

- Intangible Assets

Capitalised Software and Databases

Capitalised software is recorded at cost less accumulated amortisation and impairment. Amortisation is charged on a straight-line basis over the estimated useful life of the software being three to five years.

Configuration and customisation of a third-party's cloud-based software, in a Software as a Service (SaaS) computing arrangement, are expensed in line with IFRS Interpretations Committee accounting guidelines released in April 2021.

Mastheads

Mastheads recognised by the Group by nature have an indefinite useful life and are not amortised. Each period, the useful life of this asset is reviewed to determine whether events and circumstances continue to support an indefinite useful life assessment for the asset. Such assets are tested for impairment in accordance with the policy stated in note 23(g).

Domain Names

Domain Names recognised by the Group have an indefinite useful life and are not amortised. Each period, the useful life of this asset is reviewed to determine whether events and circumstances continue to support an indefinite useful life assessment for the asset. Such assets are tested for impairment in accordance with the policy stated in note 23(g).

- Leased Assets

At inception of a contract, the Group assesses whether a contract is, or contains, a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

As a Lessee

At commencement or on modification of a contract that contains a lease component, the Group allocates

asset has been reduced to zero.

- Payables

Notes to the financial statements

FOR THE YEAR ENDED 30 JUNE 2026

Trade payables and other accounts payable are recognised when the consolidated entity becomes obliged to make future payments resulting from the purchase of goods and services. Trade and other payables are stated at amortised cost.

- Property, Plant and Equipment

Plant and equipment, buildings and infrastructure capital are stated at cost less accumulated depreciation and impairment. Cost includes expenditure that is directly attributable to the acquisition of the item. In the event that settlement of all or part of the purchase consideration is deferred, cost is determined by discounting the amounts payable in the future to their present value as at the date of acquisition.

Depreciation is recognised on property, plant and equipment, including freehold buildings but excluding land. Depreciation is calculated on a straight-line basis to write-off the net cost or other revalued amount of each asset over its expected useful life to its residual value. Leasehold improvements are depreciated over the period of the lease or estimated useful life; whichever is the shorter, using the straight-line method. The estimated useful lives, residual values and depreciation method are reviewed at the end of each annual reporting period, with effect of any changes recognised on a prospective basis.

The following estimated useful lives are used in the calculation of depreciation:

- Buildings and Improvements 10 to 40 years
- Plant and Equipment 2 to 20 years
- Infrastructure Capital 5 to 10 years

During the period the consolidated entity undertook the management of projects which are part of the capital infrastructure program. These projects are individually assessed for appropriateness of recognition as assets within the consolidated statement of financial position of the consolidated entity. The key elements for recognition of any capital expenditure as an asset are control and ensuring that future economic benefits will flow to the consolidated entity.

- Provisions

Provisions are recognised when the consolidated entity has a present obligation (legal or constructive) as a result of a past event, it is probable that the consolidated entity will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation, the future sacrifice for economic benefits is probable, and the amount of the provision can be measured reliably.

The amount recognised as a provision is the best estimate of the consideration required to settle the present obligation at reporting date, taking into account the risks and uncertainties surrounding the obligation. Where a provision is measured using the cashflows estimated to settle the present obligation, its carrying amount is the present value of those cashflows.

When some or all of the economic benefits required to settle a provision are expected to be recovered from a third party, the receivable is recognised as an asset if it is virtually certain that reimbursement will be received, and the amount of the receivable can be measured reliably.

Notes to the financial statements

FOR THE YEAR ENDED 30 JUNE 2026

Government Grants

Government grants are not recognised until there is reasonable assurance that the consolidated entity will comply with the conditions attaching to them and that the grants will be received.

Government grants are recognised in profit or loss on a systematic basis over the periods in which the consolidated entity recognises as expenses the related costs for which the grants are intended to compensate. Specifically, Government grants whose primary condition is that the consolidated entity should purchase, construct or otherwise acquire non-current assets are recognised as deferred revenue in the consolidated statement of financial position and transferred to profit or loss on a systematic and rational basis over the useful lives of the related assets.

Government grants that are receivable as compensation for expenses or losses already incurred or for the purpose of giving immediate financial support to the consolidated entity with no future related costs are recognised in profit or loss in the period in which they become receivable.

VOBIS Nominations

VOBIS nomination fees received are deferred into unearned revenue, to be recognised as revenue in future years based upon the performance obligation of VOBIS bonuses on offer to eligible horses dependent on age.

- Income Tax

The consolidated entity is exempt from Income Tax under section 50-45 of the Income Tax Assessment Act.

- Investments in Associates

An associate is an entity over which the consolidated entity has significant influence. Significant influence is the power to participate in the financial and operating policy decisions of the investee but is not control or joint control over those policies.

The results and assets and liabilities of associates are incorporated in these consolidated financial statements using the equity method of accounting, except when the investment, or a portion thereof, is classified as held for sale, in which case it is accounted for in accordance with AASB 5. Under the equity method, an investment in an associate is initially recognised in the consolidated statement of financial position at cost and adjusted thereafter to recognise the Group's share of the profit or loss and other comprehensive income of the associate.

An investment in an associate is accounted for using the equity method from the date on which the investee becomes an associate. On acquisition of the investment in an associate, any excess of the cost of the investment over the Group's share of the net fair value of the identifiable assets and liabilities of the investee is recognised as goodwill, which is included within the carrying amount of the investment. Any excess of the Group's share of the net fair value of the identifiable assets and liabilities over the cost of the investment, after reassessment, is recognised immediately in profit or loss in the period in which the investment is acquired.

The requirements of AASB 9 are applied to determine whether it is necessary to recognise any impairment loss with respect to the Group's investment in an associate. When necessary, the entire carrying amount of the investment (including goodwill) is tested for impairment in accordance with AASB 136 'Impairment of

Notes to the f statements

Consolidation of a subsidiary begins when the Compa when the Company loses control of the subsidiary. Sp acquired or disposed of during the year are included i other comprehensive income from the date the Comp ceases to control the subsidiary.

Notes to the financial statements

FOR THE YEAR ENDED 30 JUNE 2026

Surplus or deficit and each component of other comprehensive income are attributed to the owners of the Company.

When necessary, adjustments are made to the financial statements of subsidiaries to bring their accounting policies into line with the Group's accounting policies.

All intragroup assets and liabilities, equity, income, expenses and cash flows relating to transactions between members of the Group are eliminated in full on consolidation. Investments in subsidiaries are recognised at cost.

- Parent Entity Financial Information

The financial information for the parent entity, Racing Victoria Limited, disclosed in note 18 has been prepared on the same basis as the consolidated financial statements.

- Goodwill

Goodwill arising on an acquisition of a business is carried at cost as established at the date of the acquisition of the business less accumulated impairment losses, if any.

For the purposes of impairment testing, goodwill is allocated to each of the Group's cash-generating units (or groups of cash-generating units) that is expected to benefit from the synergies of the combination.

A cash-generating unit to which goodwill has been allocated is tested for impairment annually, or more frequently when there is an indication that the unit may be impaired. If the recoverable amount of the cash-generating unit is less than its carrying amount, the impairment loss is allocated first to reduce the carrying amount of any goodwill allocated to the unit and then to the other assets of the unit pro rata based on the carrying amount of each asset in the unit. Any impairment loss for goodwill is recognised directly in profit or loss. An impairment loss recognised for goodwill is not reversed in subsequent periods.

On disposal of the relevant cash-generating unit, the attributable amount of goodwill is included in the determination of the profit or loss on disposal.

- New Accounting Standards and Interpretations

The Group adopted the following standard and amendments which did not have any impact on the amounts recognised in current or prior periods.

From 1 July 2024:

- AASB 2023-1 Amendments to Australian Accounting Standards – Supplier Finance Arrangements
- AASB 2020-1 Amendments to Australian Accounting Standards – Classification of Liabilities as Current or Non-current
- AASB 2020-6 Amendments to Australian Accounting Standards – Classification of Liabilities as Current or Non-current - Deferral of Effective Date

Racing.com Media Pty Ltd, RVL Media Pty Ltd, Racing.com Pty Ltd, and Thoroughbred Racing Productions Pty Ltd are all media related subsidiaries established for the primary purpose of the encouragement and promotion of Victorian thoroughbred horse racing, by holding, managing and exploiting media broadcasting and intellectual property rights, facilitating the payments for media rights to Racing Victoria, and undertaking any other activities the Board considers consistent with the encouragement and promotion of thoroughbred horse racing.

Racing.com Pty Ltd was deregistered on 19 February 2026.

VTRI Property Pty Ltd was established for the purpose of the encouragement and promotion of Victorian thoroughbred horse racing, as well as national and international thoroughbred horse racing, by the ownership and management of assets and provision of other services.

Basis of Preparation

The Consolidated Entity Disclosure Statement has been prepared in accordance with the Corporations Act 2001 and includes required information for each entity that was part of the consolidated entity as at the end of the financial year. The Consolidated Entity Disclosure Statement includes only those entities consolidated as at the end of the financial year in accordance with AASB 10 Consolidated Financial Statements (AASB 10). The consolidated entity is exempt from Income Tax under section 50-45 of the Income Tax Assessment Act.

Determination of Tax Residency

Section 295 (3A) of the Corporations Act 2001 defines tax residency as having the meaning in the Income Tax Assessment Act 1997. The determination of tax residency involves judgment as there are currently several different interpretations that could be adopted, and which could give rise to a different conclusion on residency. In determining tax residency, the consolidated entity has applied the following interpretations:

Australian Tax Residency

The consolidated entity has applied current legislation and judicial precedent, including having regard to the Tax Commissioner's public guidance (Tax Ruling TR 2018/5).
